

A Total Online Solution for a Healthy and Productive Office

Let's break it down. Managing office ergonomics in today's modern and dynamic work environments can seem complex. But it doesn't have to be.

Developed by practical Humantech thinkers, Ergopoint® Office Suite provides everything you need to educate and empower your people to make instant improvements and achieve a healthy and productive workplace, all while allowing you to manage the process.

| Scalable. | Comprehensive. | Simple. |
|--|---|---|
| From one to 10 to 10,000 employees and beyond! | Educate, assess, and manage data—one online tool does it all. | Training and self-assessment take only 30 minutes for your employees to complete. |

Ergopoint Office Suite features three online solutions in one:

| Online Training | Self-Assessment | Ergopoint® Manager |
|---|---|--|
| Completed in 20 minutes or less | Completed in 10 minutes or less | Helps you prioritize the need for individual assessments follow-up |
| Includes knowledge checks for learning verification | Addresses traditional or home office settings, or both! | Shows trends in equipment needs to help with purchase planning |
| Can be tied to a learning management system (LMS) | Provides immediate improvement recommendations | Stores and shares follow-up assessment results and notes |

Technical Requirements:

No installation or IT support is needed! Access to a web browser is all that's required. See Ergopoint.com for detailed specifications.
